A great bathroom doesn't need a lot of space but it does need a great idea and a great product like Rubine's newly designed one-piece rimless toilet – the Punta Nera series. This minimalistic-design WC is produced at high temperatures; its ceramic surface is formed with a less than 0.2% water absorption rate to ensure good hygiene and prevent the spread of bacteria. Rimless and Funnel Flush 3.0 is the new water-saving flushing technology; it enables the system to discharge the water with more force and in a more homogeneous way that improves the clean efficiency and reduces the noise. This toilet is also supplied with a high-quality soft-close toilet seat and a large-diameter draining hole suitable for floor and wall sewage installation.
