Stainless Steel

Cartridge

At Rubine, we know that water is a precious resource so all of our faucets are designed to achieve a minimum two ticks (Very Good) under the PUB Water Efficiency Labelling Scheme (WELS).

Also, to meet the needs of stainless steel lover, some of our ALTA series taps are made of SS304 which is lead-free and more durable. We believe our extensive line of top quality products ensure that there's something special for your bathroom and kitchen – be it simple, space or style.
