39	Care & Clean for your Rubine Sink

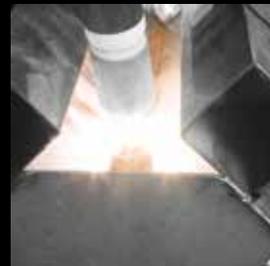

It's All About You.

CRAFTMANSHIP

PRECISION

TECHNOLOGY

SKILL

For nearly two decades, RUBINE has been working towards perfecting sinks for one type of kitchen. YOURS.

Our commitment to excellence has been reflected on the design, quality and functionality of our products. We're always improving our designs to meet your needs and expectations. It is with this in mind that RUBINE has partnered with some top designers & manufacturers in the world and won the Reddot & iF Awards in year 2016. In addition, RUBINE has gone to great lengths to complement your choice of sinks with a wide range of matching accessories to make your kitchen a talking point.

Above all, it makes a bold statment that defines YOU.

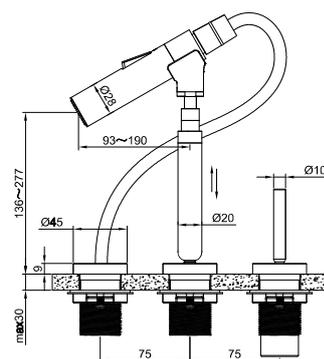

Mr Venkat Tirunagaru, has 36 years of design experiences; was born in India & migrated to Sweden in his late twenties to pursue his design career.

At the age of 23, he was the youngest designer to receive the most prestigious design award from the Prime Minister of India. Since then, his talent had caught the eye of many big organizations and his product design has bagged many International Design Award including the German Design Award and Reddot Award.

The I-sink & Magic Swan stainless steel mixer were the two most iconic products that he & his design team have created which lead them to win the Reddot Award in the same year.

Every kitchen needs a sink and a faucet and to find a faucet that is functional and match well with any sink is not an easy task. Magic Swan, a stainless steel made sink faucet, was created with this concept in mind. No doubt on the design; it is also easy to install and functional. An extendable spout holder caters to washing of bigger items and a 1.5m nylon hose covers a bigger washing area.

MAGIC SWAN

FEAST

SERIES

ABSOLUTELY FUNCTIONAL

Rubine FEAST series is designed to provide practical benefits to you. The combination of knife and waste-bin slot within the sink is absolutely functional when you are preparing a feast for your family. The knife pocket is designed with slots for different types of knife and the waste-bin comes with a flatted cover. For hygiene purpose, both the knife pocket and waste-bin are removable for cleaning. These designs not only provide convenience but also contribute a modern style to your kitchen. Available in different models and configurations to meet your needs

KIN R10

SERIES

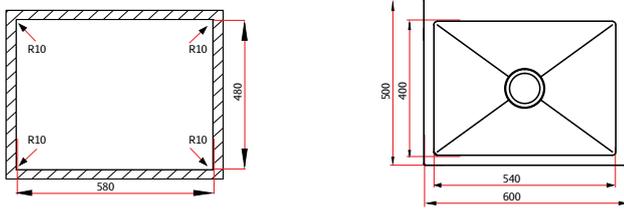

IMPECCABLE BEAUTY

KIN R10 was designed with a small radius at the 4 corners of the bowl. Just like Square sink, they are handmade from 1.2mm thick 18/8 stainless steel but with a small round corner for easy cleaning. This minor improvement has made this sink increasingly popular in the market. Available in different sizes and configurations to meet your needs and couple with a KIN series stainless steel made faucet, it will definitely be an impeccable beauty in your kitchen.

ZENITH

SERIES

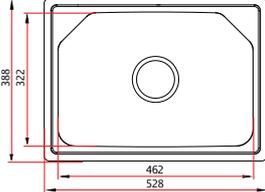

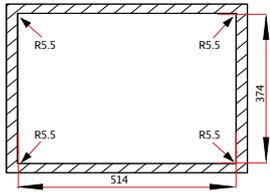

MADE FOR PERFECTION

Rubine ZENITH is a documentation of pure Italian style. With squared frame, we promise your kitchen a lead in the trend. With straight edges, we create a depth perception that makes a functional kitchen appears spacious and a spacious one appears grand. Importantly there is no welding on this sink that means no chance of leakage and with anti-frost coating and anti-noise pad, your kitchen experience would be elegant and serene.

CLASSIC R25

SERIES

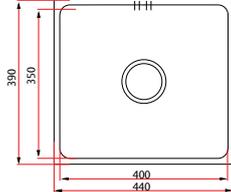

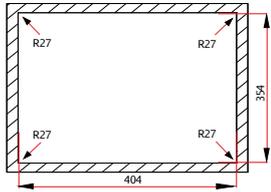

PERFECTING YOUR KITCHEN

The RUBINE CLASSIC R25 series continues the Italian brand's tradition of perfecting the modern kitchen. One major highlight of this chic new range is the R25 radius corner that effectively makes the bowl bigger and deeper. Ergonomically designed for easier washing, this series marries practicality with style in sleek stainless steel and minimalist aesthetics.

Care and Clean for your Rubine Kitchen Sink

Caring Tips:

Avoid acid attacks that may occur when acid wash of kitchen tiles is carried out during construction or renovation.

Avoid storing strong acid/alkalis household cleaning solutions under the sink.

Do not leave behind metal or rust-prone pots and pans overnight in the sink.

Do not defrost food on the sink as it will intensify condensation beneath the sink, causing damage over time.

Do not use your sink as a chopping board.

Cleaning Tips:

Daily or regular cleaning is recommended to maintain your sink in optimum condition.

Always clean the surface thoroughly after using. Concentrated residues such as salt and vinegar will cause rusting.

Keep the surface clean and dry at all times to prevent water stains.

Always test your cleaning solution on a small area before using it to clean the entire surface.

After applying cleaner, it is important to rinse completely with water immediately and wipe the surface dry, including overspray that lands on nearby surfaces.

Avoid allowing cleaners to sit or soak overtime.

Do not use cleaners containing Sodium Hypochlorite, which can decolourize or stain the surface.

Use a soft, damp sponge or cloth. Never use an abrasive material to clean surfaces.
