

RIMLESS

WATER CLOSETS

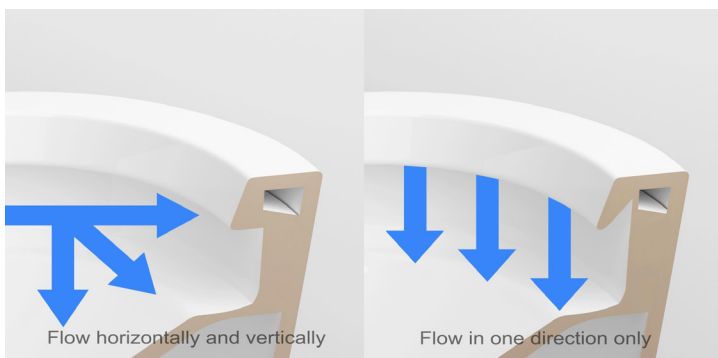

Rubine has a short history of 20 years but we know the toilet is the single most essential fixture in your bathroom. You and your family use it every day so it is important to have 100% satisfaction. Nevertheless, do not rush to install one without doing your research as the toilets of today come in different configurations & functions.

INNOVATIVE RIMLESS DESIGN

Strong current and less noise

From Box-rim to Rimless, the toilet industry has transformed a lot and it is becoming more efficient, hygienic, and fashionable. At Rubine, our design team has gone a step further to produce a funnel-shaped inner bowl with a rimless edge, this has resulted in a stronger flush current and improved its performance and water efficiency. Also, it is quieter.

Besides the flushing, the selection of raw materials like mud clay, and glaze, is another important process to differentiate a good quality toilet as they are heated at high temperatures to form a hard surface that is shiny, easy to clean, and resistant to wear. Thus, we need to control the firing temperature at over 1200 degrees to ensure the water absorption rate is less than 0.2% and also, avoid the formation of bacteria in the ceramic.

As a young sanitaryware brand, we are energetic, we listen to our customers and learn from the leader to create toilets that are safe, nice, and reliable. We strive to build trusting customers and offer personalized service quality that exceeds expectations.

Our features

Soft-edged design

Rimless design

Funnel-shaped bowl design

Trendy dual-flushing
button flat & big

Strong water flow

Soft-closing UF seat cover
Safe and quiet

Easy to remove seat cover

Smooth, shiny and
anti-bacterial.

Easy to clean and maintain

PIZ FORA

If you are planning to renovate your bathroom and are searching for the latest toilet, Rubine's Piz Fora series of toilets could be one of your short-list. Since hygiene and ease of cleaning are major toilet concerns nowadays, this soft-edged design Rimless toilet guarantees hygiene and easy cleaning. With Funnel Flush 3.0, a combination of a tapered inner bowl design and a rim-free ledge, the flushing accelerates the water flow and rinse the bowl swiftly and homogenously. This clever design means less water & low noise and it helps the environment. Other qualities include a slim-design seat cover with soft close and quick release hinges for easier maintenance. This collection proposes a total toilet solution including wall-hung, integrated 1-piece, and back-to-wall floor pan.

PUNTA NERA

A great bathroom doesn't need a lot of space but it does need a great idea and a great product like Rubine's newly designed one-piece rimless toilet – the Punta Nera series. This minimalist-design WC is produced at high temperatures; its ceramic surface is formed with a less than 0.2% water absorption rate to ensure good hygiene and prevent the spread of bacteria. Rimless and Funnel Flush 3.0 is the new water-saving flushing technology; it enables the system to discharge the water with more force and in a more homogeneous way that improves the clean efficiency and reduces the noise. This toilet is also supplied with a high-quality soft-close toilet seat and a large-diameter draining hole suitable for floor and wall sewage installation.
