MODERN ELECTRIC SMART TOILET.

ANTONIO SERIES

The Antonio Smart Toilet is an innovative bathroom fixture designed to enhance comfort and hygiene. It features advanced technology, including automatic flushing, a heated seat, and customizable bidet functions. With sensors that detect user presence, it offers hands-free operation, improving convenience and reducing the spread of germs. The toilet may also include features like air drying, odor elimination, and integrated night lighting. Its sleek design fits seamlessly into modern bathrooms, making it a popular choice for those looking to elevate their bathroom experience. Overall, the Antonio Smart Toilet combines luxury with functionality, promoting a cleaner and more comfortable environment.

Top/Front-Mounted

Front-Mounted

Motion-Detect Seat Cover
Equipped with motion sensors to detect user presence and automatically open the toilet cover for you. This hands-free feature reduces contact, promoting better hygiene and minimizing germ spread.

Rear & Front Bidet Function
This dual-cleansing bidet spray designed for men and women enhances user experiences; it is hygienic and reduces toilet paper usage, making it ECO-friendly.

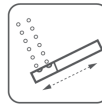

Heated Seat
Antonio smart toilets boost comfort with features like a heated seat, providing warmth, especially during cold weather or in an air-con bathroom.

Night Light
The night light offers convenience and safety with a soft glow, aiding night time navigation, reducing accidents, and adding modern sophistication to the bathroom.

ECOMatic Funnel Flushing
This flushing is smooth, automatic, and quiet; it combines a powerful flushing performance on a rimless toilet using less water.

Self-Clean & Anti-Bacterial Nozzle
Our bidet nozzle is crafted from materials that inhibit bacterial growth. It automatically cleans itself before and after each use, ensuring it remains sanitary and has no residues.

Digital Display
Our wall-hung smart toilet features a 4mm thick tempered glass panel and an LED digital interface that clearly displays the temperature, operational status, and other essential information for a quick glance.

Diatom Deodorization
Diatoms possess excellent adsorption capabilities, enabling them to capture odorous particles and convert harmful ones into oxygen particles. As a result, they promote an oxygen-rich environment, guaranteeing a consistently fresh bathroom.

Air Blower
Equipped with an air blower to gently blow warm air to dry the user after the cleansing, this feature eliminates the need for toilet paper.

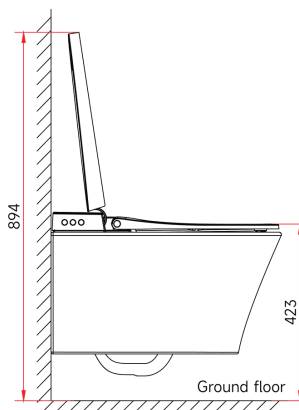

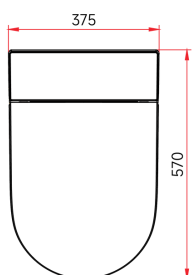

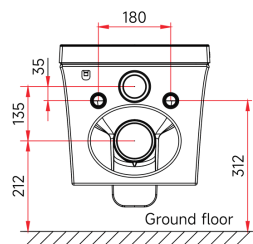

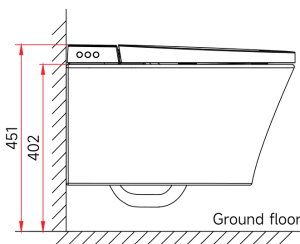

Plasma Sterilizing
Plasma sterilizing eliminates pathogens using ionized gas, enhancing hygiene and user experience in Antonio smart toilets.

Manual Flush
Even during a power failure, you can flush your Antonio smart toilet like a traditional toilet, ensuring hassle-free use at all times.

Foot Sensor
Simply wave your foot at the bottom of Antonio to effortlessly open or close the toilet cover, thanks to our convenient foot sensor.
